

# Opening Reception

Monday Feb. 2<sup>nd</sup> 2025

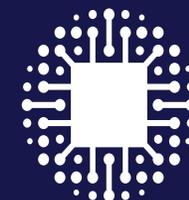

**Danish Chips  
Competence  
Centre**

14:30 Introduktion til DKCCC fokusområder og partnere

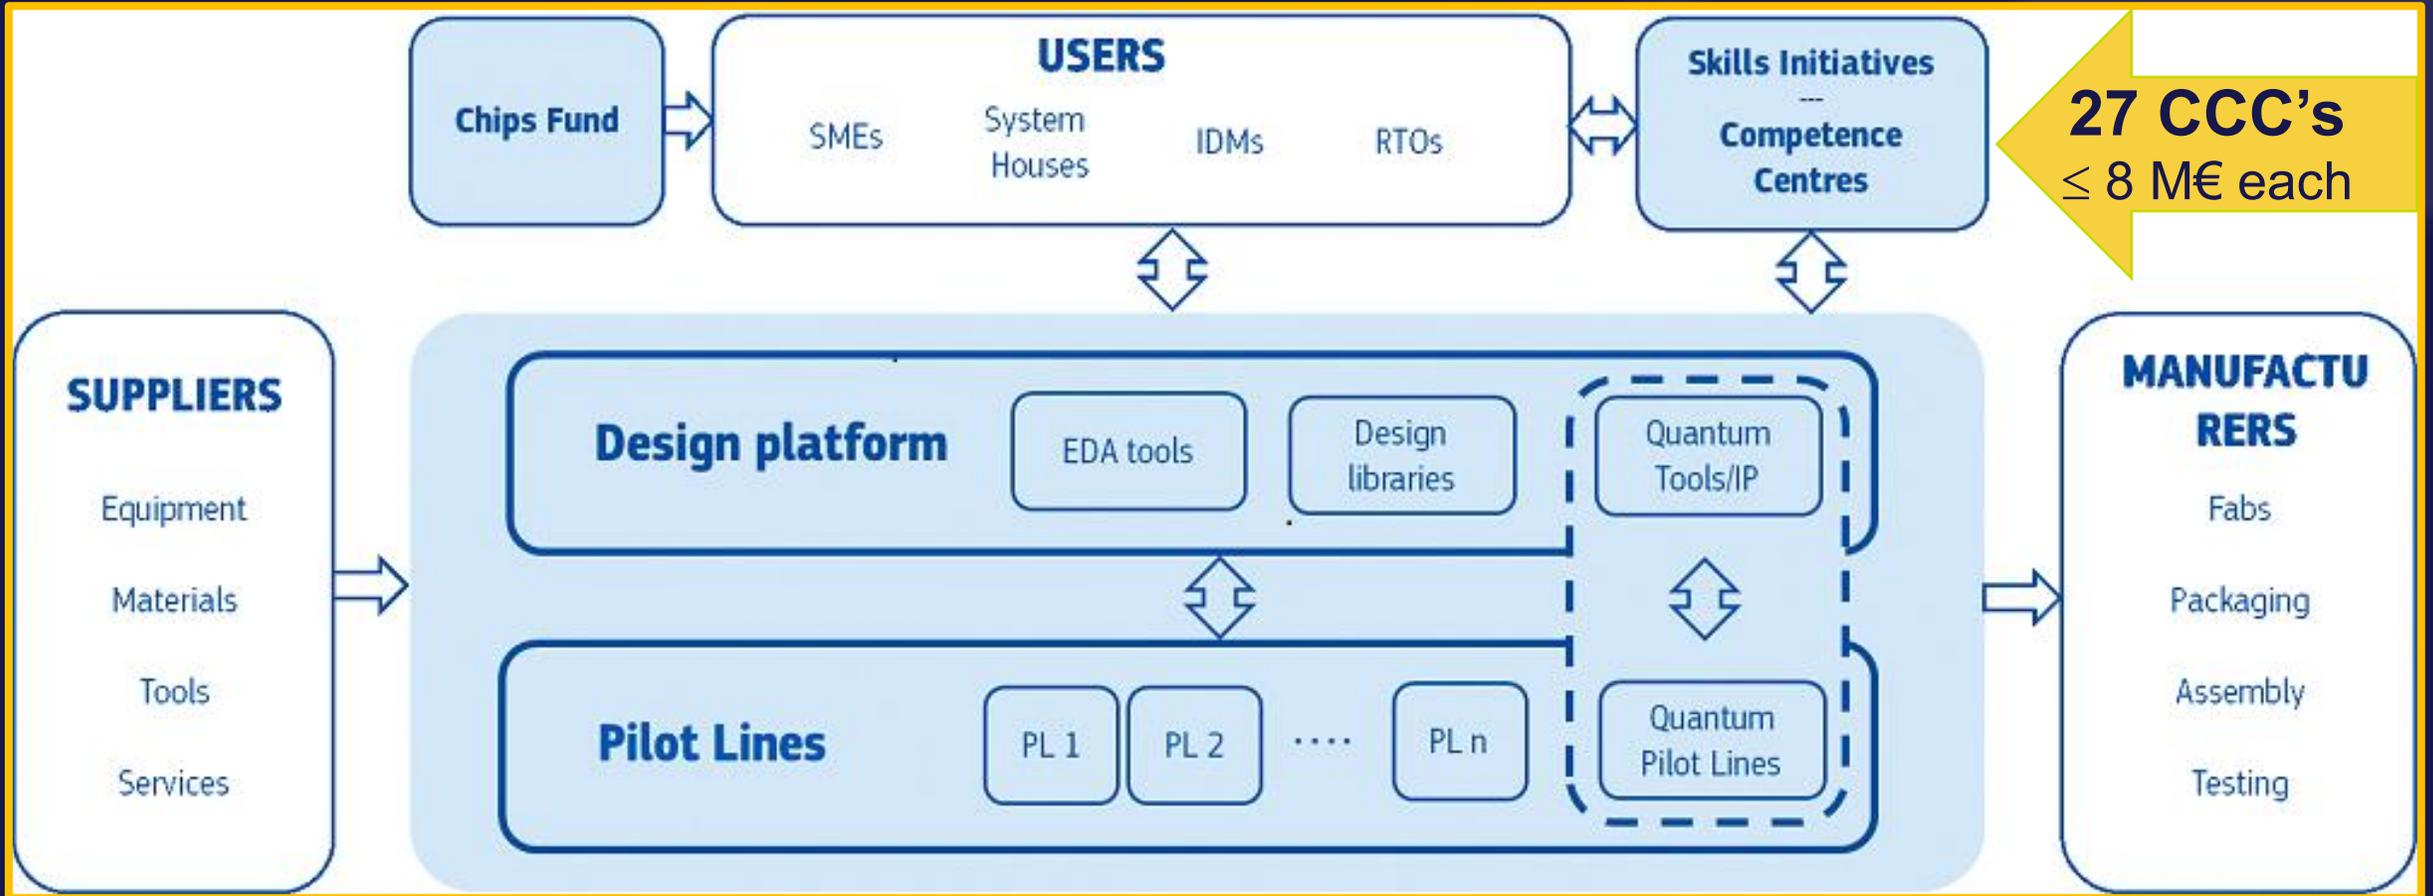

- Claus Friis Pedersen (DTU Nanolab): DkCCC overblik
- Farshad Moradi (AU): Chip-design
- Michael Kjær (DFM): Chips og avanceret karakterisering
- Peter Krogsgaard (KU): Kvanteforskning og chips

Afrunding

Danish Chips  
Competence  
Centre

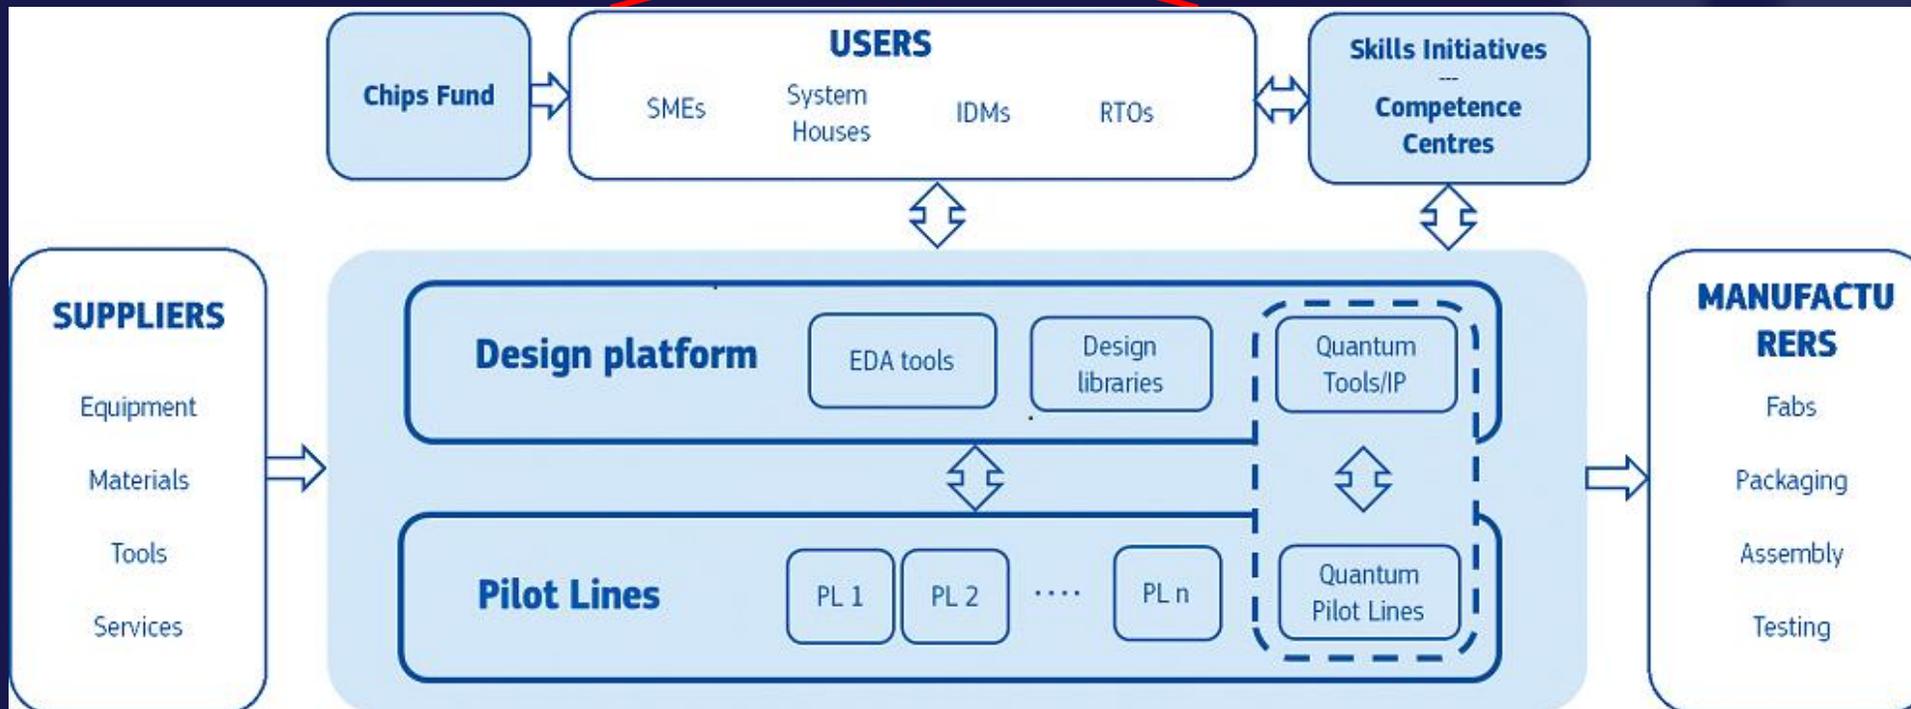

# 'Chips for Europe' Overview

# Chips Competence Centres: DkCCC Vision

Increase the number of Danish companies developing, fabricating and marketing successful chip solutions.

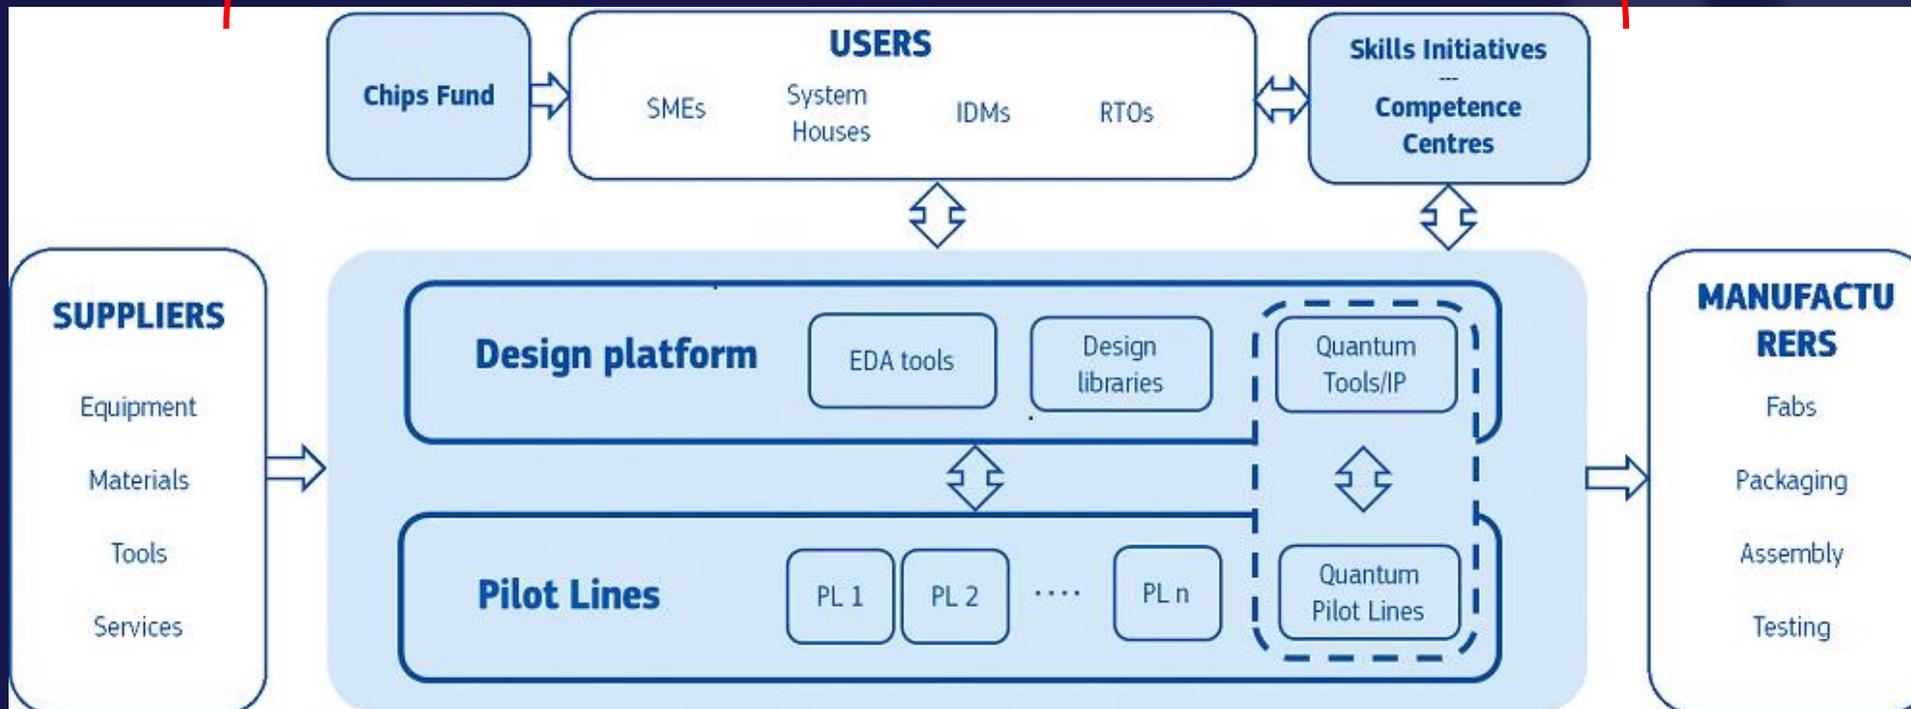

**DkCCC  
Vision1**

# Chips Competence Centres: DkCCC Vision

Establish an integrated chip ecosystem in Denmark, closely connected with EU chip competence centres and the European chip community.

**DkCCC  
Vision2**

\*Graphic is for illustrative purposes only and is not to scale

1

### Product definition and specification

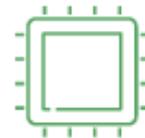

Product management, system architecture, and customer define initial product requirements

2

### Architecture/system design

System architects define block-level architecture for the design and may leverage previous IP

3

### Integrated circuit design

Multidisciplinary effort:

- Logic: Initial analog and digital design
- Circuit: Digital synthesis and design for test
- Layout: Routing and mask generation

### Verification

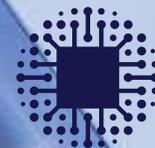

Verification engineers verify design functionality and timing through simulation

4

### Post-silicon validation

Validation engineers validate physical device functionality across extreme working conditions

# Data Trends That Challenge The Network

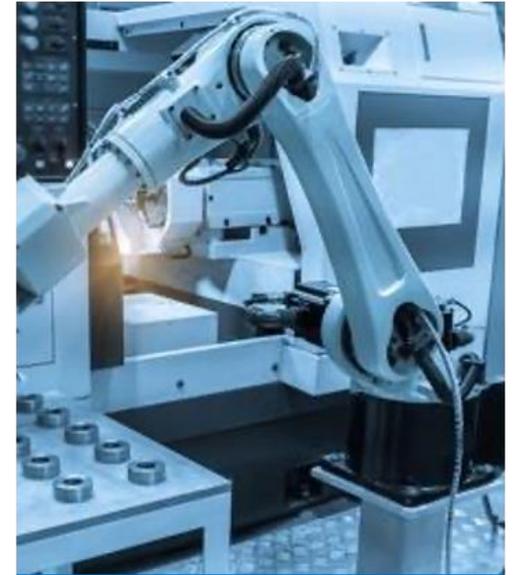

Billions of devices are becoming connected driving the need for network capacity to scale

Video content is exploding, and buffering is a deal breaker for digital natives

Artificial Intelligence infuses experiences and processes with data, but security and privacy are concerns

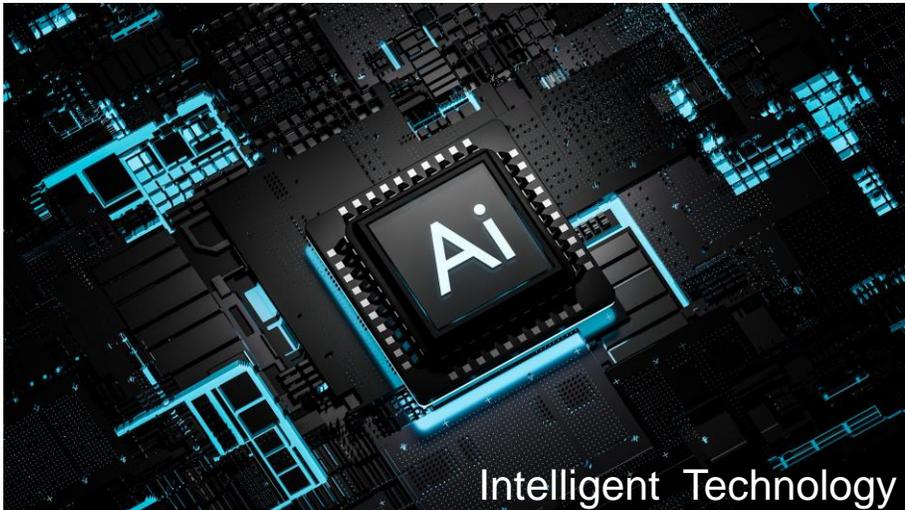

Machine-to-machine communications opens opportunities, requiring reliability and ultra-low latency

# Our Foucs

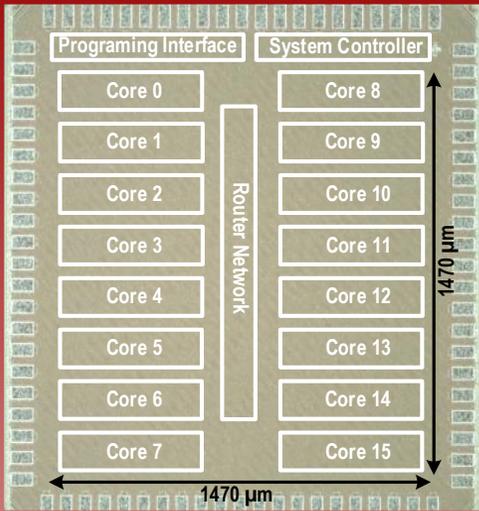

Green Technology

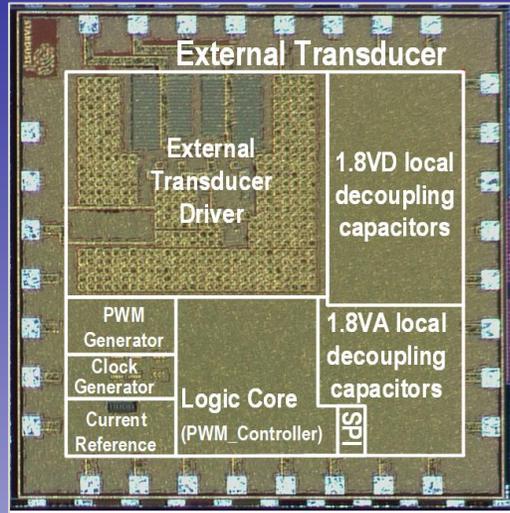

Intelligent Technology

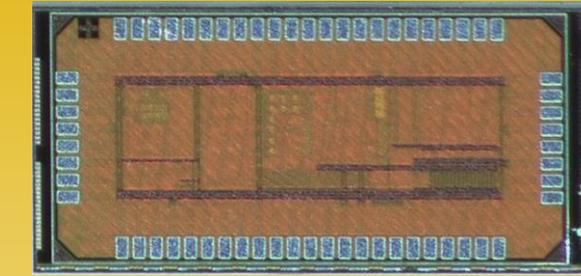

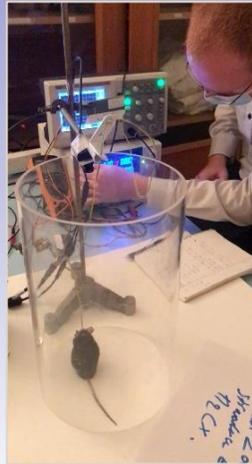

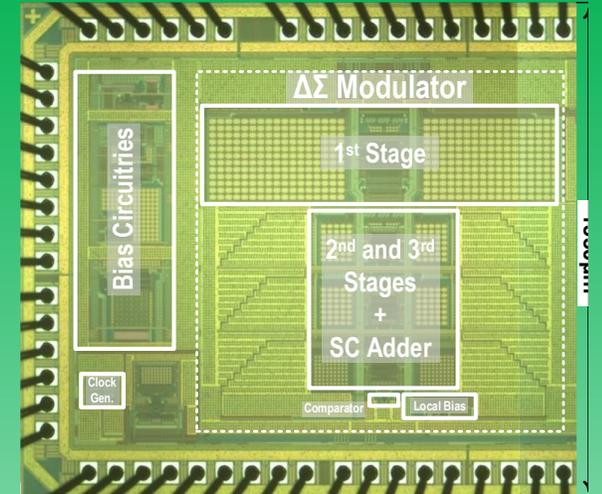

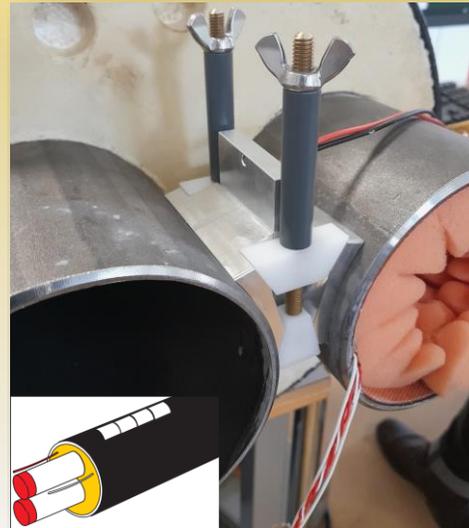

Brain-Inspired AI HW

Neural Recording

Water Leakage Sensing Chip

Spintronic  
Magnetic Field Sensor

# DKCCC Inauguration at DTU

Michael Kjær, CEO

**DFM**

Danmarks Nationale Metrologiinstitut

---

Danish Chips  
Competence  
Centre

# Danish National Metrology Institute

DFM is one of the 7 GTS institutes in Denmark that report to UFS, developing technological infrastructure critical for Danish companies and society.

We possess the highest measurement competence in Denmark within several key measurement areas.

Act as a bridge between academia and industry.

---

## 40+

Years of highly specialised metrology knowlege

---

## 43

Employees

---

## 26

PhDs

---

## 11

Specializing in quantum technology

**DFM**

Danmarks Nationale Metrologiinstitut

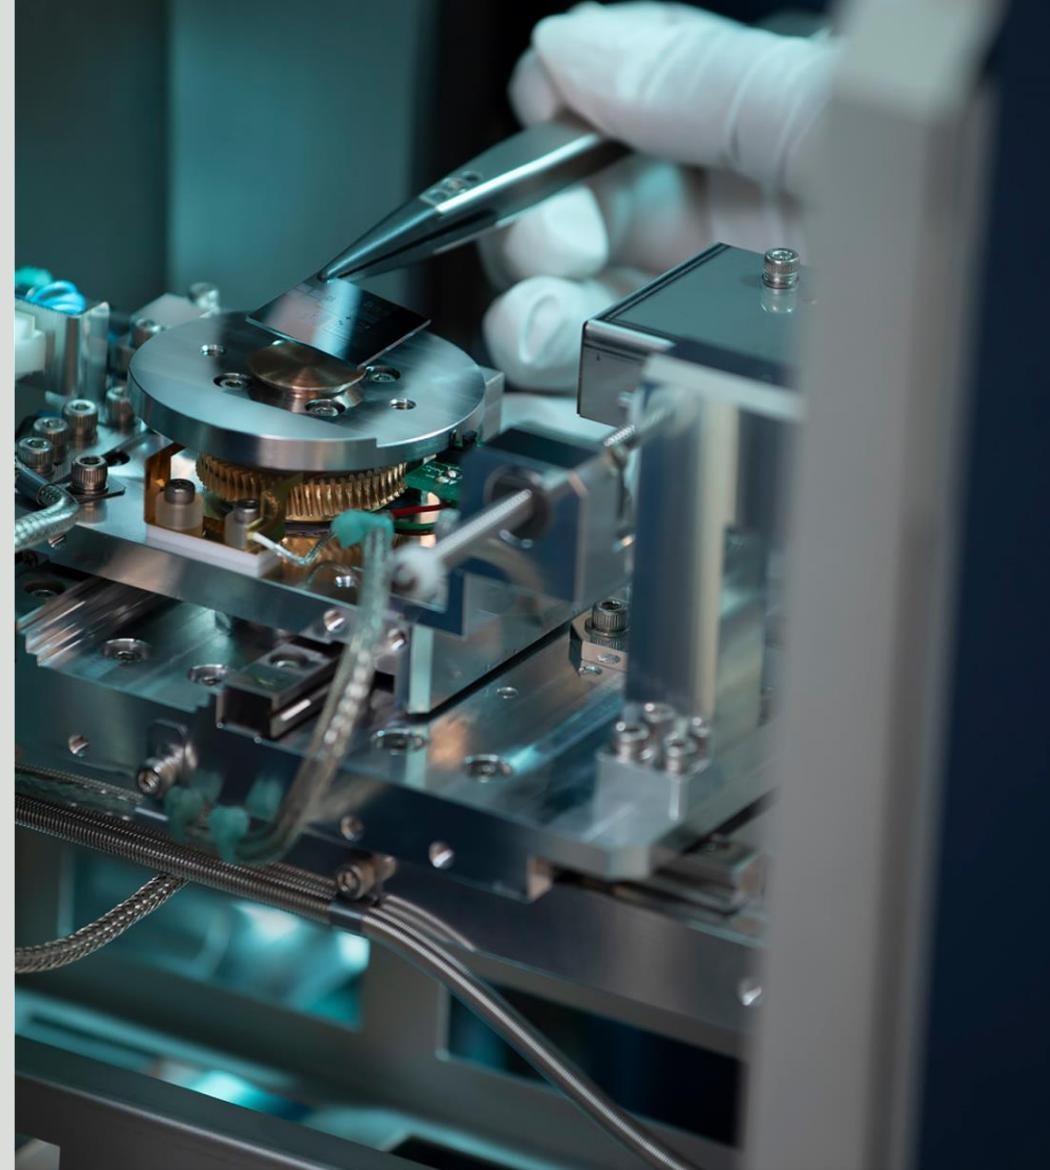

---

**Danish Chips  
Competence  
Centre**

# DFM Quantum Activities

- Development of quantum materials & metrology, superconducting circuits, single photon chips, photonic integrated circuits
- Quantum standardization, measurement equipment and measurement protocols

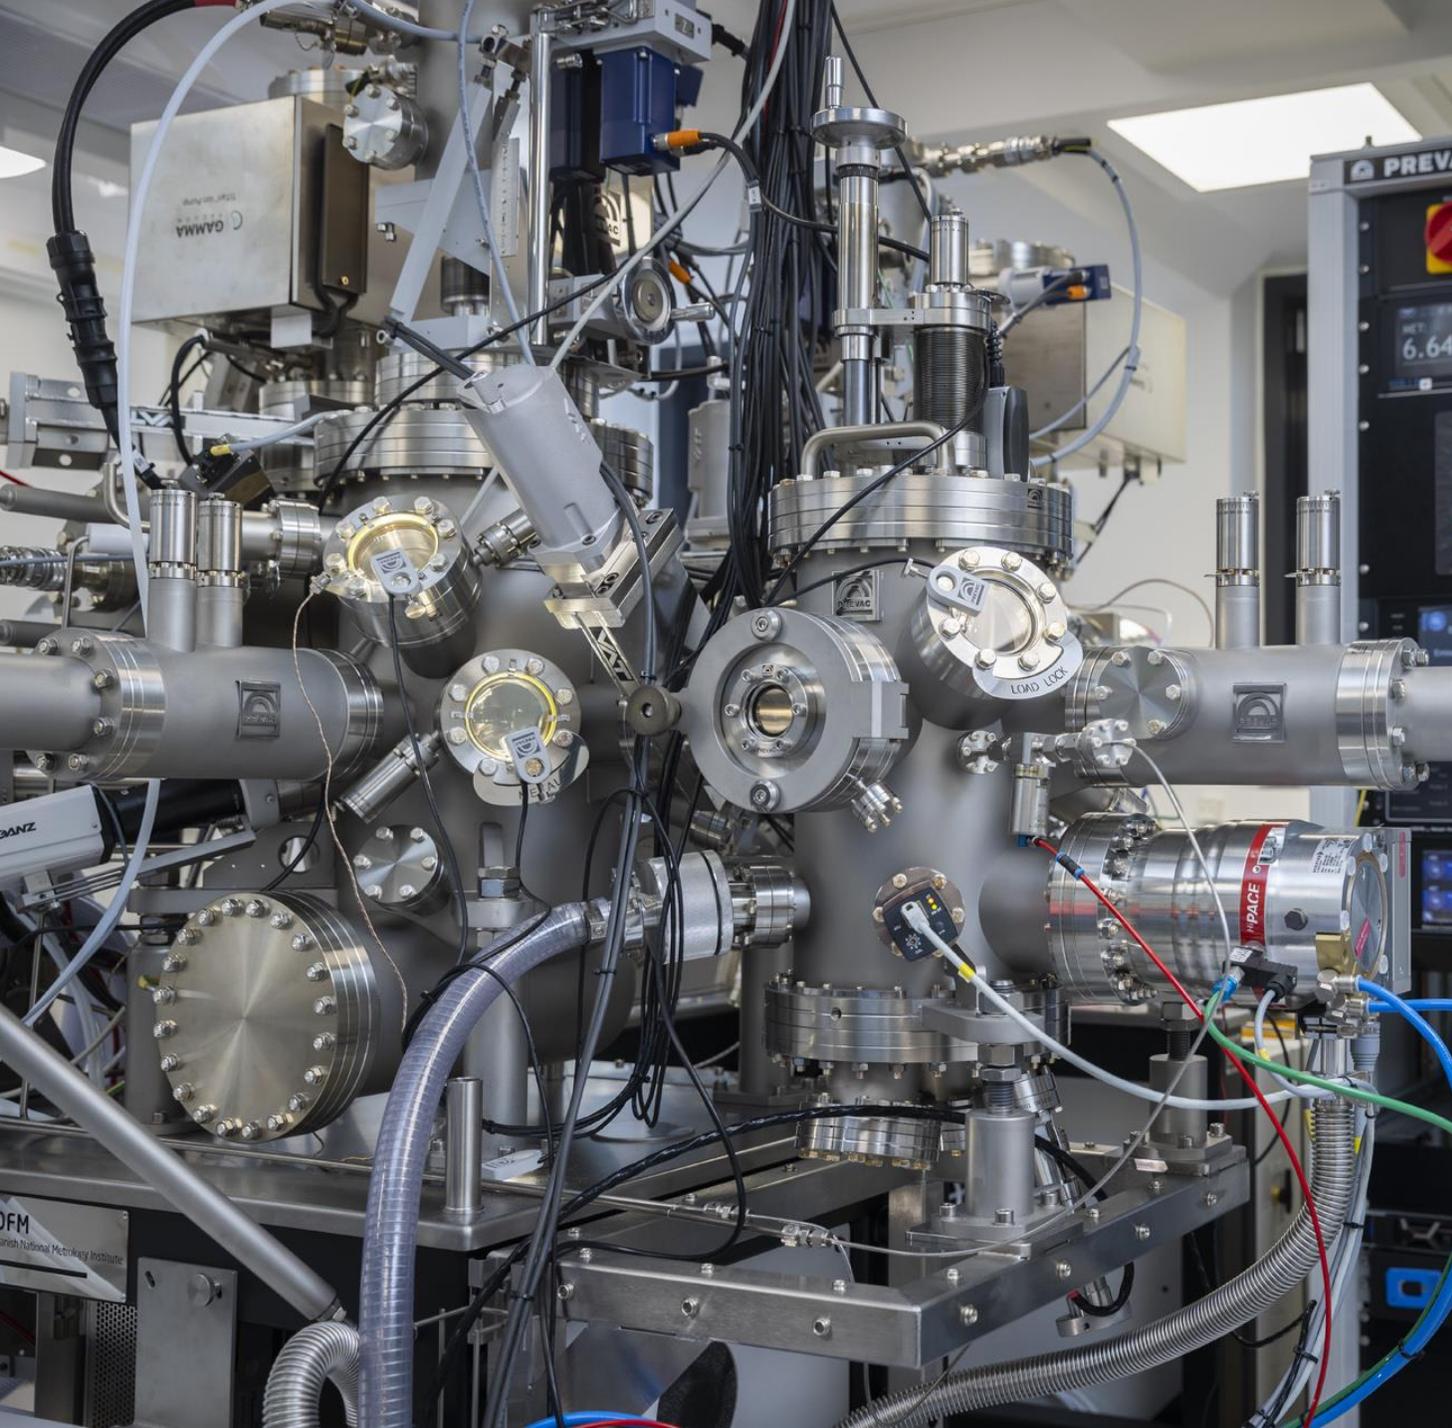

**DFM**

Danmarks Nationale Metrologiinstitut

**Danish Chips  
Competence  
Centre**

# New Quantum Materials Cluster at DFM

Brand-new molecular beam epitaxy (MBE) system

- Small volume
- Ultra-high quality
- Rapid small-scale prototyping
- In-situ lithography & characterization
- Reference samples

Chamber 1: III-V Semiconductors

Chamber 2: Metal & Superconductors

Chamber 3: Processing & Cleaning

Chamber 4: Si/Ge (end of 2025)

Chamber 5: Processing & Loading (end of 2025)

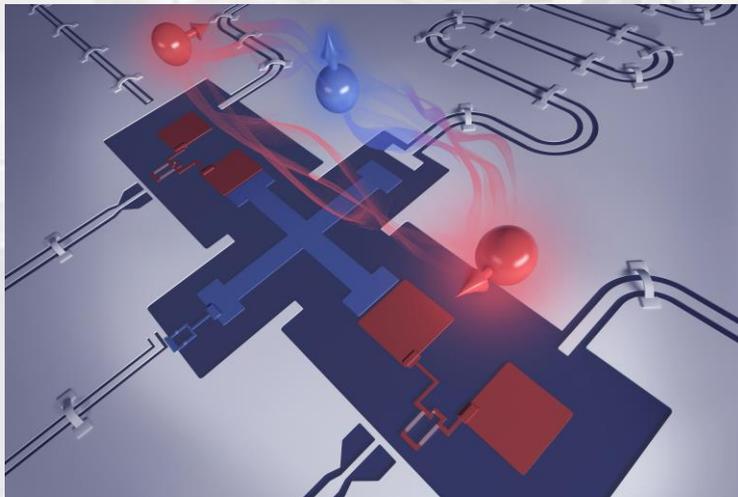

Danish Chips  
Competence  
Centre

# Activities

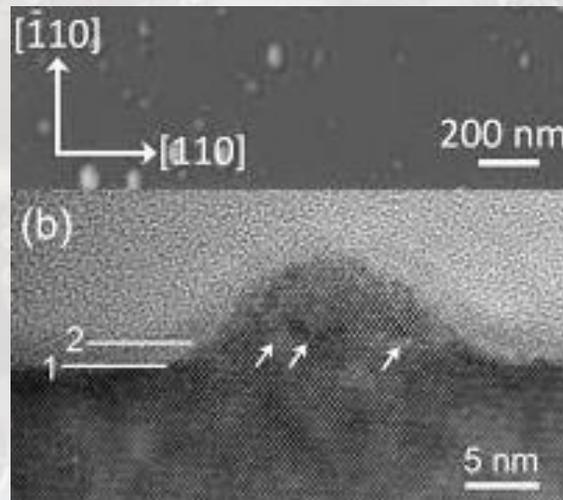

## Superconducting circuits

Fabrication and characterization of Al-based superconducting qubits.

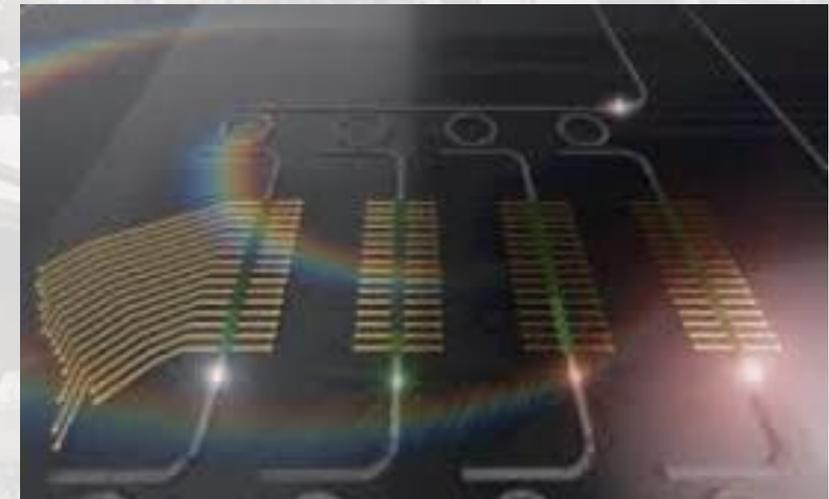

## Quantum dots

Fabrication and characterization of InAs-quantum dot & III/V waveguides.

## Photonics chips

Establishment of new characterization setups e.g. high-resolution loss reflectometry (fx OFDR).

# Quantum House Denmark & Quantum Test Center Denmark

QHD

## Facility:

- 2 floors in NBI building w. office space
- Rent to quantum companies, primarily startups
- Expected 10-12 companies, 40 employees
- 4-5 QD employees support
- Common laboratories, but few “private” areas
- Equipment investment ~10 Meuro

## Offerings:

- Business development
- Legal assistance (IPR, investment agreements etc.)
- Digital marketing
- Standardization
- Project proposals
- Symposiums, workshops etc.

# Danish Chips Competence Centre

## Peter Krogstrup

- Professor, Niels Bohr Institutet, Copenhagen University
- CEO Novo Nordisk Foundation Quantum Computing Programme (NQCP) & Quantum Foundry Copenhagen

# Leveraging **material science** to advance next generation quantum chip technologies

UNIVERSITY OF  
COPENHAGEN

Danish Chips  
Competence  
Centre

# Relevant services and activities at Copenhagen University

UNIVERSITY OF  
COPENHAGEN

## Workshop

Broad electrical and mechanical engineering services, custom made prototypes, and small series of mechanical parts.

## Epitaxy

Epitaxial thin-film depositions based on innovative molecular beam epitaxy methods. Focus on heterostructures for High Electron Mobility Layers and Integrated Photonics. Expert consultancy and services.

## Nanofab & materials characterization

Expert consultancy on nanofabrication processing and material characterization, as well as specialist-for-hire services.

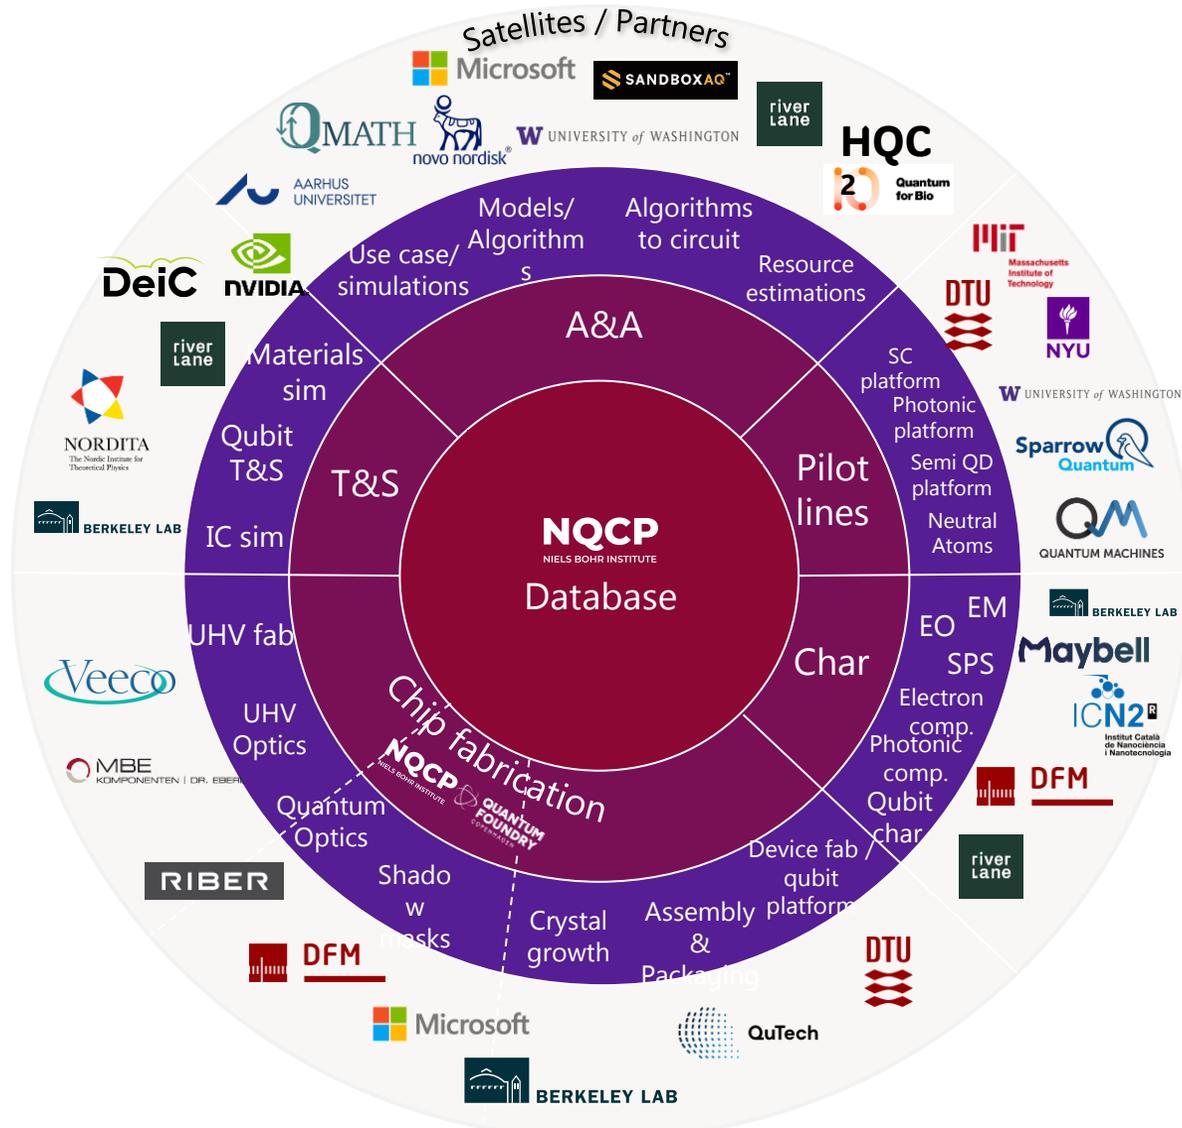

## Teaching & Outreach

Events and Initiatives to advance the quantum-readiness of the workforce. Both open enrollment and bespoke initiatives.

Danish Chips  
Competence  
Centre

# Tap into an international ecosystem with base at the Niels Bohr Institute

## Chip based quantum processor research
